

Acknowledgements

The authors wish to acknowledge the help and guidance they have received from numerous members of the South Shore community and from faculty, staff, and fellow students at the Conway School of Landscape Design. In particular they wish to thank Judeth Van Hamm, president of Sustainable South Shore, for her tireless energy and enthusiasm in initiating this project and supporting it throughout. Invaluable contributions were made by other members of the South Shore Greenway Committee (Sally Turner, Mark Fenton, Barbara Lydon, Stephen Bobo, Turner Bledsoe, and Ken Read-Brown) and by Todd Thomas and Steve Ivas .

The Conway School of Landscape Design is the only institution of its kind in North America. Its focus is sustainable landscape planning and design. Each year, through its accredited, ten-month graduate program just eighteen to nineteen graduate students from diverse backgrounds are immersed in a range of applied landscape studies, ranging in scale from residences to regions. Graduates go on to play significant professional roles in various aspects of landscape planning and design with an eye to sustainability.
