### **Scenic & Recreational River Protective Order for the North River**

#### **SECTION 5 ALLOWED USES**

(N) Construction of catwalks, wharves, docks, piers, foot bridges and wildlife management shelters, provided that such structures are either floating or constructed on pilings so as to permit the reasonable unobstructed flow of the tide and preserve the contour of the marsh, if present, and provided further that their design meets the design requirements of Section 8. One boat launching ramp not exceeding twelve feet in width may be constructed per way or parking lot, provided that there is negligible destruction or alteration of the marsh.

#### **SECTION 8 SITE DESIGN STANDARDS**

- (A) Structural Placement Standards (3) River Structures
- (a) Any structure allowed under Section 5 (N) which is built within the bounds of the natural bank of the river shall not exceed a height of 5 ½ feet above mean high water, excluding handrails, and shall not protrude more than 10 feet into the open water channel of the river.
